L.A. CA 90012 case # ~~EIR~~ ENV-2002-2481-EIR

Re: Canyon Hills Project, SCH # 2002091018

Dear Ms. Zaitzovsky,

I do not want this project rezoned.

In reviewing this EIR, I find it

misleading and incomplete.

When you review this area, you will find Verdugo Crestline Drive too narrow for 2-way traffic and evidence of volcanic action.

There must be core samples. I fought withdrawal from L.A. City, because I felt our existing zoning would be upheld.

After stopping my studies in Architecture in the South, I came to Tujunga for my allergies. I entered Real Estate in 1944. I have devoted my life to protection of our environment. I can no longer work.

I trust your analysis of this property will keep the present zoning and much more study of the impact on the environment, including our air.

The owners of the properties will own average of 4 vehicles, plus services folk. Thank you for your courtesy & considerations.

I remain,
Yours truly,
Johnyze Havel Dony
