PROJECT: Historic-Cultural Monument Application for the
SCOTT AVENUE COURT

REQUEST: Declare the property a Historic-Cultural Monument

**APPLICANT/
OWNER:** Jim B. Nichols
4375 Glencoe Avenue
Marina del Rey, CA 90292

**OWNER'S
REPRESENTATIVE:** Historic Resources Group
1728 Whitley Ave.
Los Angeles, CA 90028

RECOMMENDATION **That the Cultural Heritage Commission:**

1. **Declare** the property a Historic-Cultural Monument per Los Angeles Administrative Code Chapter 9, Division 22, Article 1, Section 22.171.7
2. **Adopt** the report findings.

ZIMAS Report

FINDINGS

The building “embodies the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction” as an example of Spanish Colonial Revival style residential architecture.

CRITERIA

The criterion is the Cultural Heritage Ordinance which defines a historical or cultural monument as any site (including significant trees or other plant life located thereon) building or structure of particular historic or cultural significance to the City of Los Angeles, such as historic structures or sites in which the broad cultural, economic, or social history of the nation, State or community is reflected or exemplified, or which are identified with historic personages or with important events in the main currents of national, State or local history or which embody the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction, or a notable work of a master builder, designer or architect whose individual genius influenced his age.

SUMMARY

Constructed between 1927-1930 and located in the Echo Park area, this ten-unit residential bungalow court exhibits character-defining features of Spanish Colonial Revival architecture. The complex consists of two rows of one-and two-story detached residential buildings, arranged around a stepped central courtyard and concrete stairwell. Both of the buildings have flat roofs and stepped clay tile parapets, with sloped and gabled section variations. Exteriors are clad in textured stucco, with each building featuring a slightly different arrangement of decorative elements on the façade. Windows are of several varieties, including double hung, casement, aluminum frame sliders, louvered, and multi-paned arched windows. Each unit has a recessed entryway, with some entrances having private patios. Significant interior spaces include original hardwood flooring and baseboards, decorative door and window surrounds, wooden doors with original hardware, built-in cabinetry, and original kitchen tile countertops. Each row of bungalows sits atop four garage bays at the street level.

The proposed Scott Avenue Court historic monument was designed in 1927 by John Freese, a draftsman in the architectural office of Schultz and Weaver. The subject property was constructed during a period of rapid population growth in Los Angeles, particularly in the Echo Park area.

The subject property appears significant as an example of a Spanish Colonial Revival style bungalow court, and also for its association with the development of Echo Park in the 1920s.

Later alterations to the subject property include the renovation of bathrooms over the years, and the enclosure of a porch attached to the front unit on the property's east end.

DISCUSSION

The Scott Avenue Court property successfully meets one of the specified Historic-Cultural Monument criteria: “embodies the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction.” As a significant residential building designed in the Spanish Colonial Revival style, the property qualifies for designation as a Historic-Cultural Monument based on these criteria.

BACKGROUND

At its meeting of July 17, 2008, the Cultural Heritage Commission voted to take the application under consideration. On August 7, 2008, the Cultural Heritage Commission toured the subject property.

9. HCM Physical Description

Property: 1463-1469 4/5 Scott Avenue aka Scott Avenue Court

The ten-unit residential bungalow court occupies a sloped rectangular parcel on the north side of Scott Avenue in the Echo Park area of Los Angeles. The approximately 11,600 square foot parcel is located on a street of single- and multi-family residential buildings. This bungalow court displays elements of the Spanish Colonial Revival style, and is composed of two rows of single- and two-story residential units arranged around a steep, stepped courtyard. Original scored concrete stairs run up the center of the courtyard, and provide accessed to each unit. A metal hand rail runs through the center of the bottom flight of stairs and along the sides of the remaining higher flights. Planter beds flanking each bungalow entry contain small shrubs, flowers, and mature trees. A concrete walkway runs the length of the property behind each row of bungalows. Many of the units have private patio areas flanking the front entry doors.

The street level front façade of the two rows of bungalows bisected by the central courtyard and stairway, are dominated by two units in each building sitting atop four garage bays. Each of the eight garage bays are closed with a wooden tongue-and-groove pull-up door. The front unit on the east end has a porch that has been enclosed, and retains its original scored concrete floor. The space is accessed through the original porch doors, a pair of wood sash, multi-light French doors.

The bungalows are of wood-frame construction clad with textured stucco with each having a slightly different arrangement of common façade decorative architectural elements and window configurations. All have flat roofs and stepped molded parapets capped with clay tile, with sloped, gabled or shed roofs section variations, also with clay tile. There are pedimented protruding bays with large multi-light windows. The front doors are recessed, and some have pent or pedimented overhangs and are clad in clay tile. Each unit has a light fixture above the front door or set within a recessed arched decoration that sits on the wall next to the door. Windows consist of large fixed wood sash multi-light rectangular and arched windows, one-over-one double hung wood sash, wood sash multi-light casements, aluminum sliders, and louvered windows. Many of the windows retain their original wood sills. The primary façades of many of the units open up to the courtyard. Two units display a faux chimney on this façade. The faux chimneys each have an arched multi-light window. The rear facades face away from the courtyard, and most units have back entrances. Many have intact paneled wood doors.

Each bungalow units is between 800 and 1800 square feet and contains a living room, dining room, kitchen, bathroom, one or two bedrooms and closets. Variation in the arrangement of common architectural details in each unit interior is a recurring theme. All units exhibit many original interior features, including hardwood flooring, smooth and rough plaster walls, wood baseboards, decorative wooden window and door surrounds, single-panel wood interior doors with original hardware, wooden built-in cabinetry, and kitchen tile countertops.

All but one of the living rooms of the units retains the original arched cutout leading into the living room from the dining area. Walls and coved or arched ceilings are finished in rough plaster, smooth plaster or a spray-on acoustical finish. Most units have new light fixtures and wall heaters, though one unit retains the original floor heater. Most units display one or more of the following: a double-wide closet with wood shelving, a closet with an original single panel wood door with original glass hardware, a pair of multi-light wood frame doors and arched alcoves. Dining areas feature original hardwood flooring, except for one unit which has resilient flooring; there are rough plaster walls, and ceilings are coved and have either a rough plaster or spray-on acoustical finish. One unit has a half-height wood built-in shelving unit that flanks a square cutout leading in to the dining area from the kitchen. Another unit has a built-in wood china cabinet with multi-light, wood frame doors. Another retains an original ironing board closet with the original panel wood door.

All kitchen spaces feature resilient flooring, smooth plaster walls and ceilings, and non-original light fixtures. Most units retain their original enameled cast iron sinks. Two double sinks can also be found. About half of the units still have original tile counters and backsplashes. Much of the upper and lower cabinetry has been replaced. There is an original built-in wood China cabinet with multi-light glass doors in one unit and an original ironing board closet can be found in another.

The bathrooms typically have been altered over the years. Many have their original hexagonal floor tiling, though one has resilient flooring. Most walls and ceilings are smooth plaster. There are a variety of sink designs including, original wall mounted enameled cast iron, non-original wall mounted porcelain and a non-original porcelain pedestal units. There are a variety of medicine cabinet designs including, original wood, non-original wood and non-original metal. Some medicine cabinets retain original decorative wood surrounds. All units retain original enameled cast iron bathtubs. Some showers retain their original tile, and the remaining are updated replacements.

All bedrooms feature single-panel interior and closet doors. Walls are clad in smooth plaster and ceilings are clad in smooth plaster or have a spray-on acoustic finish. One unit has a built-in wood linen closet, and another has a shallow rectangular alcove.

The property at 1463-1469 4/5 West Scott Avenue aka the Scott Avenue Court meets the requirements set forth by the Cultural Heritage Ordinance for a Historic-Cultural Monument because of its historical and cultural significance. The property is significant due to its association with the development of the Echo Park neighborhood and the Los Angeles region during the 1920s. The Spanish Colonial Revival style, Scott Avenue Court is an exceptional representation of a multiple family, housing type built on a tight budget, and in a hillside context for inhabitants of modest incomes. The dwellings of the site embody the distinctive characteristics of the bungalow court, a building type characteristic of residential development in Los Angeles during the early decades of the 20th century.

Close to Downtown Los Angeles, the development of the hilly Echo Park neighborhood began in the 1860s with a reservoir catch-basin. In 1868 a dam was installed across the canyon where a park now lies near Glendale and Sunset Boulevards. Echo Park benefited from the philosophies of Fredrick Law Olmstead when in 1895 the city dredged the site to create a lake, and landscaped its perimeter with willows, eucalyptus and garden shrubs, ensuring the character of the area for the future. At the end of the 19th century, a horse-drawn trolley carried passengers up a dirt road that is now Echo Park Avenue from the street car line at Temple Street, which lead into hills covered with fields of native grasses and wild flowers. At that time small farms and ranches dotted the hills and canyons of Echo Park, and its sister neighborhoods of Elysian Heights and Angelino Heights.¹

Street car lines helped to connect Echo Park with central Los Angeles and other nearby towns, hence lending a hand to make it a viable community. After the area was subdivided by a team of investors lead by carriage maker turned real estate developer Thomas Kelley, in the 1890s property owners began to develop the business district along Sunset Boulevard and the dense single-family and apartment houses near Echo Park Lake. With the dramatic population growth of Los Angeles between 1880 to 1930 from 11,183 to 1,238,028 the bucolic fields and farm houses gave way to Victorian mansions, Craftsman bungalows, Spanish Colonial style homes and court dwellings of various styles, and brick storefronts. By the Great Depression of the 1930s, there were few empty lots to build upon in Echo Park.²

The Scott Avenue Court is a skillful example of the a multiple family courtyard building variation that consciously attempted to duplicate the amenities of the single family, freestanding house (or apartment house) in a landscaped park and the promise of a sublime existence in sun-drenched Los Angeles. The low-rise courtyard building would become the dominant multiple family dwelling type in Southern California, with the earliest occurrence of this type being the bungalow court. In the first three decades of the 20th century, the bungalow court was very popular throughout the Los Angeles region, especially in Pasadena, Santa Monica and Hollywood. Composed of a series of individual dwelling units oriented around a central courtyard, this property type promised much of the quiet and privacy of a single-family house with the flexibility and affordability of rental housing.³

Early versions of the bungalow court were often composed of a single row of detached units arranged along a side court featuring vernacular Craftsman style detailing. In the 1920s, it became more common for the courts to be composed of somewhat larger buildings, or a series of attached units, designed in one of the period revival styles popular at the time. Spanish Colonial Revival became the most popular architectural style in the design of bungalow courts after World War I.⁴

The Spanish Colonial Revival style emerged due to a conscious effort by architects to emulate historic Spanish architectural traditions borrowed from Moorish, Byzantine, Gothic or Renaissance inspiration and decorative precedents. Well suited to Southern California's warm dry climate, the exotic appearance and a sense of historic depth of these styles appealed to many Southern California residents, particularly those relocating from other parts of the United States. Characteristic features of the style include smooth stucco wall cladding, low-pitched tiled or parapeted roofs, pedimented overhangs, arched window and door openings, balconies, porches and patios, asymmetrical façade arrangements and decorative tile or ironwork. As can be seen at the Scott Avenue Court, the bungalow courts tended to adopt a somewhat simplified version of the style.⁵

18. HCM Statement of Significance

Property: 1463-1469 4/5 West Scott Avenue aka Scott Avenue Court

Built in 1927 and 1930, the compact Scott Avenue Court dwellings, designed by John Freese, a draftsman in the architectural office of Schultz and Weaver, are organized around a central axis and a unique topography--the sloping context of the site. One of the diverse examples of courtyard architecture in this region, the two rows of detached, one- and two-story structures are situated at street level and on three terraces up a steep hill. The structures are a mix of single, one- and two-bedroom dwelling units. The car is accommodated in garages situated in the lower level of the two-story buildings at the street level of this hillside property.⁶

The terraced dwelling rows are bisected by a concrete stairwell that resembles a village street more than a courtyard in a similar manner to the cul-de-sac or dead-end streets of the Arab cities of Southern Spain. The climb to the top of the stairs offers views of the valley, the surrounding hillsides and the horizon beyond; some of the dwelling units also have these views and sun-drenched light depending on their site orientation. The staircase landings are the entrance platforms to the dwellings; most have ample outdoor space for resident's relaxation. Landscaping and gardens along the semipublic and private spaces contribute to the overall ambience of this hillside court.

Today, bungalow courts are becoming increasingly rare. With rising land values and intensifying development pressures, lower-density multiple family housing in Los Angeles are rapidly being demolished at an increasingly alarming rate. The larger lots they occupy are highly appealing to developers who replace them with multi-story buildings with larger units and subterranean parking.

The property at 1463-1469 4/5 West Scott Avenue is eligible for designation as a Los Angeles Historic-Cultural Monument for its association with the growth and development of Los Angeles in the 1920s, and as a good example of the bungalow court, a building type that is highly characteristic of residential development in the area during the early decades of the 20th century, yet increasing rare in Los Angeles today. The site displays the characteristic orientation of an even number of buildings around a central axis, running from the street to the rear of the property. The sloping context of the site is a unique topography feature for the bungalow court building type. The picturesque massing of the buildings with Spanish Colonial Revival architectural details, including stucco exterior cladding and parapeted roofs, are also common features of the type as constructed in Los Angeles during the 1920s.

⁶ Building Permits, City of Los Angeles Department of Building and Safety; and Site Visit by Author, 3 April 2008. The author learned Freese worked for Schultz and Weaver at the time of the Scott Avenue Court construction from the *Los Angeles City Directories* of 1925 and 1926. The author learned from other *Los Angeles City Directories* Freese also worked for other prominent architects in the region: John Parkinson & Donald B. Parkinson (1929); and John C. Austin and Fredrick M. Ashley (1931, 1936).
