^aState motor gasoline prices are the same for the commercial, industrial, and transportation sectors.

Notes: Motor gasoline estimates include fuel ethanol blend not equal sum of components due to independent rounding.

^bDue to consumption weighting, U.S. average commercial price is \$28.57 per million Btu, U.S. average industrial price is \$28.82 per million Btu, U.S. average transportation price is \$28.77 per million Btu, and the U.S. average price of all sectors is \$28.77 per million Btu.

Sources: Data sources, estimation procedures, and assumptions. Notes.

Where shown, (s) = Btu value less than 0.05.
