Hello.

I just want you all to know that Hollywood does NOT need any more supertall buildings. Traffic is already terrible, and there are already plenty of people coming to Hollywood every day. We don't need more cars, more crowds, or more lines.

The charm and beauty of Hollywood is its quaint and historic buildings like the existing Crossroads Of The Pacific.

Please please please do not let developers and profits destroy one of the most iconic and important areas of Los Angeles. Don't allow Hollywood to turn into New York City or Tokyo.

We have to stop covering the entire planet with towering skyscrapers!!! Please let Hollywood stay old and sweet and lovable.

Thank you.
