**Comment Review Period:** Originally July 31, 2014 – September 15, 2014, **now extended to September 30, 2014.**

**EXTENSION OF COMMENT PERIOD:** The City of Los Angeles (City) prepared a Draft Environmental Impact Report (EIR) for the Studio City Senior Living Center (SCSLC) Project in compliance with CEQA. The City released the Draft EIR on July 31, 2014 for 46 days. In response to a request received from the Council Office (CD2), in addition to other requests received requesting an extension, the comment period is being extended to September 30, 2014.

**PROJECT DESCRIPTION:** The proposed Project includes the construction of a new 200-condominium unit senior housing development with an associated subterranean parking structure, known as the Studio City Senior Living Center, on a site currently used for recreational purposes known as Weddington Golf and Tennis. The existing 16 tennis courts and tennis uses on the site would be removed to accommodate the Project; however, the existing golf course, driving range, clubhouse, and other golf uses would be retained, with modifications.

**PERMITS AND APPROVALS:** The Project would require various approvals and may include, but would not be limited to, the following: a Tract Map; Conditional Use Permits for the golf uses and alcohol sales; a Zone Variance for various golf elements; a Building Line Removal; a Site Plan Review for the residential uses; on a portion of the site, a General Plan Amendment on a portion of the site from Open Space to Medium Residential, and a Zone Change from A1-1XL to R3-1; and excavation, demolition, grading, revocable/encroachment, haul route, and building permits; and any additional actions as may be deemed necessary or desirable.

**ANTICIPATED SIGNIFICANT ENVIRONMENTAL EFFECTS:** Significant and unavoidable impacts have been identified with regard to: localized air quality construction (short-term) emissions related to particulate matter and construction (short-term) noise at sensitive receptors. Significant and unavoidable cumulative impacts have been identified with regard to: localized air quality construction emissions and construction noise. Other issues addressed in the Draft Environmental Impact Report (EIR) include: aesthetics/visual quality, views, and light/glare; air quality; biological resources; cultural resources, including historical resources; geology, soils, and seismicity; greenhouse gas emissions; hydrology, surface water quality, and groundwater; land use and planning; noise; population and housing; public services (fire protection, police protection, and library services); recreation and park services; transportation and circulation; and utilities and service systems (energy and water supply). With implementation of mitigation measures, compliance measures, and project design features, no significant and unavoidable Project or cumulative impacts other than those identified above are expected with regard to construction or operation of the Project.
